

Is your business seeking solutions to energy, water and resource efficiency challenges?

Ai Group Environmental Solutions Forum

Ai Group's environmental solutions forums help companies to solve their environmental challenges in the areas of water, energy and waste. The forums bring together companies facing environmental challenges with companies providing environmental solutions as well as providing networking opportunities.

When: Wednesday 17 November 2010, 9.00 am – 12.00 noon

Where: 20 Queens Road Melbourne VIC 3004
(opposite Albert Park Golf Course)
(commercial parking available in Queens Lane)

Cost: FREE

RSVP: 10 November 2010

Climate Change Adaptation – what it means and what are the opportunities?

Climate change presents industry with potential impacts, risks and opportunities. The prolonged drought, bushfires and increasing frequency of extreme weather events with their resultant impact on the economy are examples of the consequences of unavoidable climate change.

Get on the front foot now to understand the implications and opportunities of climate change including new products, new strategies and new markets.

If you want to know more about...

- Implications for industry
- How other businesses are proactively preparing for climate change
- The strategies leading companies have in place?
- Emerging market opportunities for business?

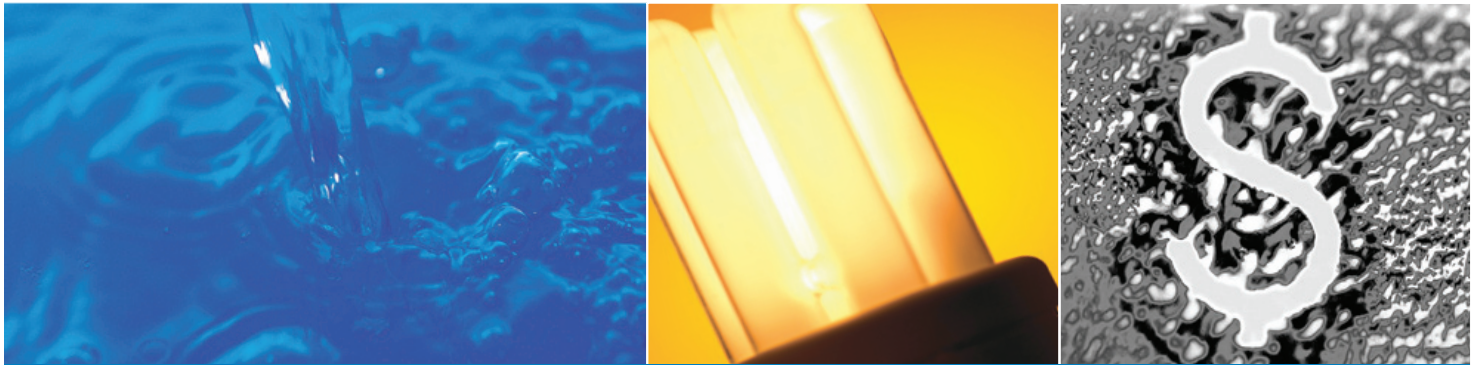

then you should register to attend this FREE event.

This FREE seminar will look at the opportunities to adapt to climate change

PRESENTERS:

- **Climate change adaptation – what it means and what are the opportunities, Professor Jean Palutikof, National Climate Change Adaptation Research Facility.** Learn about the implications and opportunities of climate change for industry.
- **Climate change adaptation and new business opportunities for the building and construction sector, Martin Jones, CSR.** This presentation will discuss the new business opportunities from climate change including new products i.e. low carbon products.
- **Preparing for a carbon constrained future, Virginia Wheway, Boeing Australia.** This presentation will discuss the likely impacts from climate change on the airline sector and Boeing is adapting to these impacts.
- **Smart Grids - An energy network response to climate change, SP AusNet.** Learn how smart grids and smart systems are delivering services more efficiently.
- **Implications of climate change for infrastructure, Associate Professor Ron Cox, University of New South Wales.** Learn how climate change could impact on the built environment and could lead to disruption of supply of services and other social and economic impacts.
